

DISCLOSURE AND DISCLAIMER

- 1) The information that follows from Donnay Detoxicology LLC contains links to collections of peer-reviewed articles about carbon monoxide that open webpages of the US National Library of Medicine at www.pubmed.ncbi.nlm.nih.gov. From the PubMed site--over which Donnay Detoxicology LLC has no control--you can save or export the articles in the collections.
- 2) The articles in each collection were selected by Albert Donnay, a consulting toxicologist who has specialized in CO poisoning since 1999. He selected the articles for their relevance to the topics and not for their accuracy, integrity, clinical utility, or any other reason.
- 3) The collections are not regularly updated and so only should be considered illustrative, not exhaustive. To find more recent articles on any topic "X", you can search at www.pubmed.gov for ("carbon monoxide" and "X")
- 4) *By clicking on the links provided below to any of Donnay's collections, you acknowledge this disclosure and agree not to hold Albert Donnay or Donnay Detoxicology LLC responsible for any false, misleading, or outdated information that the selected articles may contain.*

For more information on Donnay Detoxicology's library of over 1,500 PubMed collections on CO-related topics, see www.tinyurl.com/COpapers

CARBON MONOXIDE RISK FACTORS:

GAS POWER TOOLS

Gas power tools of all kinds may cause carbon monoxide poisoning if they lack a catalytic converter that converts carbon monoxide to less harmful carbon dioxide. Those without a catalytic converter emit much more CO than gasoline powered vehicles with working converters.

Among the gas power tools that have been reported to poison people with CO are lawnmowers, leaf blowers, snow blowers, chainsaws, and floor buffers.

For a collection of peer-reviewed articles on PubMed curated by Albert Donnay about the **CO poisoning caused by gas power tools**, see:
